6. Roger is working on a cage design and decides to use the golden ratio as a guide. If the width (long side) is 250 decimeters, what should the height be?
$\square$
7. Miranda measures the distance of the cat's face as 150 cm . She measures the height of the cats face as 90 cm . Is the cat's face proportioned similar to the golden ratio? Show the math.
$\square$
